DAFFIN TANJIRO WIDISON

+62-823-3223-2896 | dtwdaffintw@gmail.com | https://www.linkedin.com/in/daffintw/ | https://github.com/Daffin-TW
Surabaya, Indonesia

Data Science fresh graduate with hands-on experience in data processing, analysis, visualization, and predictive modeling. Proficient in Python, data wrangling, data engineering, databases, machine learning, deep learning, and web scraping. Experienced as a Data Scientist and Sales Analyst Intern for 5 months. Passionate about leveraging data-driven approaches to solve business and technical problems, with strong analytical, problem-solving, and collaboration skills.

WORK EXPERIENCES

Widison Tutorship – **Independent Tutoring Business** *Feb 2025 – Present*
Founder & Tutor

- Delivered 100+ tutoring sessions in Python programming and foundational data science, tailored to learners' skill levels.
- Provided individualized guidance in coding, data analysis, and problem-solving through structured lessons and practical exercises.

Advance With Unity Internship – **Surabaya, Indonesia** *Feb – Jun 2025*
Data Scientist, Project Executor

- Developed a token-efficient chatbot using LangChain and GPT, enabling dynamic responses based on up-to-date company documents.
- Developed a Deep Learning-based prediction model for Ventricular Septal Defect (VSD) to support early detection and data-driven analysis.
- Collaborated with a team using GitHub for version control, code synchronization, and efficient project development.

Indosat Ooredoo Hutchison Internship – **Surabaya, Indonesia** *Aug – Dec 2024*
Direct Sales Analyst, Direct Sales Division

- Developed and deployed an interactive sales dashboard using Python using Streamlit that visualized key sales metrics daily/monthly sales for management, improving data-driven decision-making.
- Implemented a data-driven approach to postpaid product offerings by segmenting customers based on usage patterns and demographics.

EDUCATION

Universitas Pembangunan Nasional "Veteran" Jawa Timur – **Surabaya, Indonesia** *Aug 2022 – Jul 2026*
Graduated, Data Science, GPA: 3.94/4.00

- Awarded a certificate of achievement for graduating with the highest GPA among students in the same major during the graduation period.
- Developed an IoT and Deep Learning-based Indonesian Sign Language (BISINDO) translation device designed to bridge communication between non-sign language users and sign language users.
- Successfully made a project in the form of the fastest route road application on the UPN Jatim Campus which was presented at the UPN Jatim Edu Expo activity.

PROJECTS

Srawung Sor Pring Surabaya UMKM Database *2025*

- Designed a MySQL database from information collected from a website listing UMKM's participating in Srawung Sor Pring Surabaya.

Telecommunication Product Pricing Analysis *2024*

- Processed and analyzed product selling-price data using Python, then created visualizations in Tableau to communicate insights.

SKILLS

Hard skill	Data Analysis, Data Engineering, Data Mining, Statistics, Machine Learning, Deep Learning, Internet of Things, Web Scraping, Power BI, Tableau, Excel, Spreadsheet, SPSS, Python, SQL, and R
Soft skill	Communication, Teamwork, Problem Solving, Adaptability, and Time Management
